

Frazier Healthcare Growth Buyout Acquires Vein Clinic Platform

Seattle, WA, December 29, 2017 – Frazier Healthcare Partners (“Frazier”) is pleased to announce the acquisition of a majority ownership stake in Vein Clinics of America (“VCA” or the “Company”), the seventh platform investment for Frazier Healthcare Growth Buyout Fund VIII.

VCA is a leading provider of treatments for chronic venous insufficiency (*e.g.*, varicose veins) primarily through vein ablation and sclerotherapy procedures. The Company operates 58 outpatient vein clinics in 14 states. With a total physician base of 57 doctors, VCA was identified by Frazier as one of only a few vein clinic operators of national scale, and views the Company as an attractive consolidation platform in a highly fragmented market.

Hans Thumen, hired in 2015 as CEO, will remain in place along with his team of key executives with strong medical, marketing and operational expertise. Frazier General Partners, Ben Magnano and Nathan Every have joined Hans on the Board of Directors. Frazier Vice President, Phil Zaorski, will join as an observer.
